Tom

Sorry it took me a while to get back to you with this, but I wanted to see the roof go through the winter. There is no question we had zero leaks, but that was expected with a new roof. The big, added bonus, was the savings in gas as a result of the additional insulation. Everything you said was true.

I want to thank you for taking the time to get out here before and during the job. The extra time your company spent to rough in the additional air vents and air conditioning compressors on the roof was much appreciated when the contractors left us leaking and suffering. That was way beyond the call of duty, and we certainly appreciate your extra efforts.

The way the job was completed without causing any commotion was also excellent. No one had to even move a car, and we did not find one nail, screw, or piece of debris in the parking lot during or after the job. Seamless.

I kept your brochure for almost 5 years after we initially talked when I bought this building. Yes, I did get 3 quotes when we purchased the roof, and yes, the other companies had a lower price. After reviewing the roofing systems, there was really no long term savings though. Kwalyti Tool already saved almost two thousand dollars on Gas this year compared to last year, and 2008-9 was a colder winter than 2007-8. I am 100% happy and I will always refer anyone looking for a new roof. Any time you need to use 1690 as a show piece in Batavia, feel free.

Sincerely

Gordon Erickson
