Dura-Ply Roofing Corp.
151 S. Rohlwing Rd.
Addison, IL 60101

Attention: Mr. Thomas Preston

Our roof was installed in 1995.

As we were researching our roof, we investigated replacing our existing tar and gravel roof with the same technology as before. One of the options we explored was the membrane roof with the pressure/vent system offered by Dura-Ply.

Our Dura-Ply salesman was very informative and knowledgeable about his product explaining the advantages of the roofing system. He was able to offer us a superior roof at a competitive price

We were extremely pleased with the installation process and now after 18 years, feel that we have a quality roof far superior to the old tar and gravel. This roofing system has exceeded our expectations and we feel that it is going to be serviceable for years to come.

When it comes time to get another roof, we would definitely call Dura-Ply Roofing Corporation.

Sincerely,

A handwritten signature in black ink that reads "Jim Kohl". The signature is written in a cursive, flowing style.
